

How do **On Target Solutions** benefit process performance ?

- ◆ **On Target Solutions** employ Advanced Regulatory Control (ARC) strategies to improve process performance, both throughput and product quality.
- ◆ **On Target Solutions** employ model based control strategies for improved energy management with reduced fuel costs.
- ◆ **On Target Solutions** improve automatic response to process upsets.
- ◆ **On Target Solutions** encourage operation closer to spec limits with confidence.
- ◆ **On Target Solutions** de-couple loop interactions for improved unit operations.
- ◆ **On Target Solutions** are typically very robust, and are not limited by model boundaries as process conditions move outside the design case.
- ◆ **On Target Solutions** minimize advanced control loop dead-time and response delays.
- ◆ **On Target Solutions** motivate incremental process improvements that combine into significant rewards.

On Line Service Award

Demonstrated performance of **On Target Solutions** for more than 5 years without routine maintenance.

How do **On Target Solutions** reduce bottom line expenses ?

- ◆ **On Target Solutions** drive advanced control strategies to the lowest possible control level.
- ◆ **On Target Solutions** establish best-practices & reusable engineering for similar control strategies and unit operations.
- ◆ **On Target Solutions** are quickly adaptable to account for changes in process conditions.
- ◆ **On Target Solutions** capitalize upon the value of the existing process control system.
- ◆ **On Target Solutions** allow for routine advanced control maintenance at the control processor level, using skills typically available within the plant staff.
- ◆ **On Target Solutions** reduce capital spending associated with expanded hardware platforms, personnel training, and life cycle maintenance.
- ◆ **On Target Solutions** require a smaller engineering investment to deliver incremental returns per process unit.
- ◆ **On Target Solutions** establish a strong foundation for additional APC or Model Predictive Control.

**Why not maximize the return on your control system investment?
Install On Target Solutions today!**
